EXPERIENCE

Software Engineer | Ozoned Digital

Oct 2021 - Present

As Software Engineer in Ozoned Digital, I am working on InsureTech Products, developing its Backend & APIs Development in PHP Laravel along with working VueJS for frontend.

Software Engineer | EcoLogix

Feb 2021 – Sep 2021

As Software Engineer in EcoLogix,

- Developing & maintaining the different Projects of International clients in PHP Laravel, Cake PHP & CodeIgniter.
- Integration of Accounting Software (QuickBooks, Xero, Sage One & Xero) and Other Third-Party APIs
- Developing Restful APIs for Be fulfilled & 3dLifestyle Mobile App

Software Engineer | IT Falcons

September 2019 – Feb 2021

As Software Engineer, I worked on advance and multi platforms alongside Team of IT professionals in developing different website applications using latest technologies as Frontend development with Html, CSS, JavaScript, Vue.JS, Backend Development with PHP Laravel Framework and Database Development in MySQL. I am responsible of developing, integrating, testing and maintaining the web applications. Some of my key responsibilities are as follows:

- Developing the Frontend, Backend and Database development in Different Projects.
- Payment Gateway Integration in web applications
- Assisting other team members in database and back-end development

Associate Software Engineer | IT Falcons

01 April 2018 – 31 August 2019

I Rejoined IT Falcons as Associate Software Engineer as Part Time Job during my studies. In this period, I started working on different live projects of web applications using PHP Laravel Framework that helps me to explore my technical skills, time management by completing different tasks.

Internee, Junior Associate Software Engineer | IT FALCONS

29 May 2017 – 15 September 2017

I have done first internship in IT falcons. During this internship, I worked on the web development and desktop application. After internship, I worked in junior associate software engineer, in that duration I utilize my skills on different live project.
